Dear Client:

You may have recently received a letter from Molina regarding their preferred contract. As a result of that letter, we have received a number of calls requesting clarification on the status of MSCL's contract with Molina. To clarify the situation, Molina's new contract with this national lab merely supplements the **local and regional** contracts with laboratories such as MSCL.

Be assured that MSCL maintains a long-term **regional** Provider Participation Agreement contract with Molina for our service area. Because of this contract, we are considered a participating provider for Molina, including Healthy Options, Basic Health Plans, Children's Health and Molina's Medicare product. Doctors and patients may continue using our services as we remain a preferred provider.

If, however, your Molina patients are referred to a non-participating laboratory, they will be subject to higher healthcare costs associated with other medical plans. Therefore, in order to keep costs down, it will be important to refer all laboratory work for Molina members to a Molina **participating provider** such as MSCL.

Should you have any questions regarding our enrollment with this health plan, please feel free to contact your MSCL representative, or your Molina representative.

Sincerely,

Tim Amato
